EFU UNIVERSAL LICENCE v1.1

Supplementary to Creative Commons Attribution 4.0 International (CC BY 4.0)

Copyright Holder: Simor István
Effective Date: 14 January 2026

This licence governs the use, reproduction, application, and institutional deployment of the **Equivalent Flux Unit (EFU)** framework and its derivatives.

This licence supplements **CC BY 4.0** and overrides it where EFU-specific integrity, measurement, or governance rules are concerned.

---

1. CORE DEFINITIONS (NON-NEGOTIABLE)

The EFU is a **biophysical accounting unit** representing the metabolic load placed on the Earth system by one human life.

The EFU baseline is fixed as:

1 EFU = 20 kg resources per day per person = 7.3 tonnes per year per person

This baseline includes the following locked reference fluxes:

Component	Definition
EFU-C	7.3 tonnes CO_2-equivalent per person per year
EFU-P	0.55 kg phosphorus per person per year
EFU-N	16 kg nitrogen per person per year
EFU-W	1,000 litres of freshwater per person per year

These values define the **Reference Annual Carbon Flux (RACF)** and the **planetary metabolic anchor** of all EFU-based systems.

They **may not be altered, re-scaled, normalised, or redefined** under any use of this licence.

---

2. GRANTED RIGHTS

Under this licence, any natural or legal person may:

2.1 Freely use EFU for:

- Scientific research
- Education and teaching
- Public policy analysis
- Environmental, social and governance (ESG) modelling
- AI sustainability measurement
- Institutional reporting

2.2 Develop EFU-based sector standards, including but not limited to:

- EFU-GOV (public administration)
- EFU-AI
- EFU-FIN
- EFU-IND
- EFU-HEALTH
  (collectively referred to as **"104.xx standards"**)

2.3 Use EFU commercially for:

- Consulting
- Sustainability audits
- Policy reports
- Corporate or government advisory work

Provided that:
No EFU-based **certification, label, compliance badge, or official status** is issued without the use of the **EFU-104.3 Audit Protocol**.

---

3. ABSOLUTE PROHIBITIONS

The following are strictly prohibited worldwide:

 Redefining EFU baseline values
 Altering EFU-C, EFU-P, EFU-N, EFU-W or RACF
 Patenting EFU formulas, including but not limited to:
  • RACF
  • SS (Sovereignty Gap)
  • MROI (Metabolic Return on Investment)
 Issuing "EFU-certified", "EFU-approved" or equivalent labels without documented EFU-104.3 audit
 Claiming ISO, UN, GRI, EU, or governmental endorsement without written authorization
 Using EFU for greenwashing or misleading sustainability claims

---

4. ATTRIBUTION

All public or institutional use must include the following attribution:

Simor István, (2026). *EFU Universal Licence v1.1*. Supplementary to CC BY 4.0.

In digital use, this attribution must be visible in documentation, dashboards, reports, or metadata.

---

5. TERMINATION

This licence terminates automatically and without notice if the licensee:

- Modifies or redefines EFU core values
- Claims false institutional endorsement
- Issues EFU certification without EFU-104.3 compliance
- Uses EFU for deceptive sustainability claims

Upon termination, all rights to use EFU cease immediately.

---

6. GOVERNING LAW

This licence is governed by the laws of **Switzerland**, chosen for neutrality, treaty enforceability, and intellectual-property protection.
