105.4 – CONTINUITY PROTOCOL

HEIRS, BENEFICIARIES, AND SYSTEMIC INTEGRITY

Status: LOCKED / MANDATORY

Version: 1.0 (Diamond v5.1)

Date: 2026-03-07

I. THE GUARDIAN COUNCIL (Systemic Immune System)

To prevent Governance Capture (Ref: 600.18), the EFU system is governed by a collective "Guardian Council."

- **Voting Threshold:** A 8/10 majority is required for any critical protocol adjustment.
- **Composition:** 5 environmental scientists and 5 technology/legal experts to ensure multidisciplinary balance.
- **Anti-Coercion Clause:** Any written resignation or transfer of rights issued under duress (external pressure/blackmail) is automatically void by this protocol.

II. HEIRS AND BENEFICIARIES

The economic and intellectual legacy is divided into three equal parts (1/3 – 1/3 – 1/3).

1. **SIMOR DÁVID ISTVÁN** (Legal Heir)
   - Sole legal successor to all material assets (books, data, copyright).
   - Automatic **L6 Fellow Status**: Granted the right to join the high-level operational council at any time, should he choose to participate.
2. **TARR ZSUZSANNA** (Beneficiary)
   - Equal one-third share of the legacy.
   - Recognized for the daily logistical and moral support that enabled the completion of this work.
3. **PUSKÁS PETRA VIOLA** (Beneficiary)
   - Equal one-third share of the legacy.
   - Recognized for the daily logistical and moral support that enabled the completion of this work.

III. ONTOLOGICAL CORE & INTEGRITY

"Knowledge is what lifts us up."

- The 105-series documents are **LOCKED** to maintain the "Spiritual Constitution" of the EFU system.
- **Open Access:** All data remains archived via Zenodo and GitHub under CC BY 4.0, ensuring it cannot be sold, deleted, or manipulated by corporate interests.

EXECUTIVE SUMMARY: EFU FRAMEWORK v5.1

Quantitative Ontology for Global Systemic Integrity

- **The Problem Space:** Current systems (ESG/GDP) have detached from biophysical reality, leading to greenwashing and cognitive entropy.
- **The Solution (EFU):** A universal unit based on thermodynamics and metabolic biology, not political consensus.
- **Fundamental Minimum (Φ_{base}):** Every human requires ~20 kg of biophysical flux (air, water, nutrients) per day. This is the "Inalienable Biological Right."
- **Operational Architecture:** Utilizing the **CDS** (Critical Data Set) to monitor systemic integrity (CII), atrocity potential (API), and managerial coherence (VKI).
